DETAILED ACTION

Reopening of Prosecution

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. The amendments filed by applicant after the final rejection have therefore been entered.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. **Claims 1-118 are rejected** because the claimed invention is directed to non-statutory subject matter. Claims 1-118 are not directed to any one of the areas of patentable subject matter, such as product, process, process of making or composition. For a claim to be statutory under 35 USC 101 the following two conditions must be met:

1) In the claim, the practical application of an algorithm or idea results in a useful, concrete, tangible result,

According to the above guidelines, Applicant's claims are limited to the manipulation of abstract ideas in the context of patentability using non-functional descriptive language.

The independent claims can be made to become statutory subject matter by restructuring the steps of originating a lease, analyzing a lease, and managing a lease in the logical order of the invention as supported in the embodiments described in the specification.

Applicant is advised to satisfy the statutory requirements for the claims. Applicant is also advised not to add any new matter to the specification or the claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 1-125 are rejected under 35 U.S.C. 112, second paragraph**, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The steps for originating a lease, analyzing a lease, and managing a lease, critical or essential to the practice of Applicant's invention, are not recited in the claim(s). Omission of such steps in a method claim make the claim indefinite because it is unclear how to implement the steps of the invention.

Correction is required.

Allowable Subject Matter

4. **Claims 1, 2, 28, 31, 60, 74, 93, 102 and 119 are allowed** because the claimed limitations read over the prior art of record.

Claims 3-27, 29-30, 32-52, 54, 55, 61-73, 75-83, 94-101, 103-118 and 120-125 are allowed due to their dependency on independent claims 1, 2, 28, 31, 60, 74, 93, 102 and 119.

Response to Arguments

5. Applicant's arguments filed July 20, 2006 have been reconsidered but are moot in view of the new ground(s) of rejection.
